

ILIAD

A BOOK RECOMMENDER APP

Interested into books?

ILIAD is made for you!

Actually it's not made yet, but it'll be!

There are so many apps out there to recommend you so many things, like good restaurant, food, movie, music but what about books?

What if you just want to start reading books, and you read no books before?

what if you are an expert in reading but don't know what to read about a specific new topic?

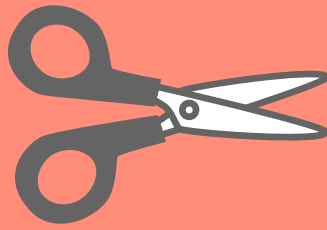

& what if, if you want to spend less time finding the best book suitable to your needs in life?

That was the last "What If" :)

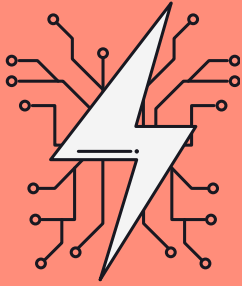

The answer is ILIAD!
TADAAAA!!!

We want to make the best recommendation system for books out there!

Trust me, Jeff Bezos also started his business with books!

STATE-OF-THE-ART RECOMMENDATION SYSTEM

**We have the Method,
We have the Data
Just need YOU to implement it!**

But please don't steal the idea like Zuckerberg :)

GO TEAM!

Help me build a team to realize this idea

Team Requirements:

- Entrepreneurial attitude is a must
- Proficiency in Coding, Machine Learning, Neural Network
- Proficiency in UX and backend/frontend development
